SUMMARIES

The Hearth Tax return for Michaelmas 1665 only shows the names for chargeable hearths, unlike the return for Lady Day 1664 which lists names for both chargeable & not chargeable hearths and therefore the total number of houses in each parish. By comparing the numbers in these two returns it is possible to arrive at a probably fairly accurate idea of the total number of houses in each parish at Michaelmas 1665, by applying the same ratio of charged to not charged houses. These comparisons are given in the following pages, together with the figures for 1671, 1673 and 1801 to give an idea of the trend within each parish.

	LadyDay 1664	Michaelmas 1665	Prob	Mmas 1671	LadyDay 1673	1801 Census
	Total Houses	Charged hearthshouses	Charged Total houses	Total houses	Total houses	Inhabited houses
