Presidential Address, 2009. Some Picturesque influences upon the study of natural history in 19th century Herefordshire *by David Whitehead*..... 17
The early members of the Woolhope Club inherited an appreciation of landscape which was romantic rather than scientific. Their descriptions of field meetings are combined with contemporary sketches and paintings to illustrate how this changed as the century progressed.

Charles Darwin and the Woolhope Club *by Alan Stone*.....51
To celebrate the 150th anniversary of the publication of *On the Origin of Species*, this paper traces the effect of the theories of evolution on the Woolhope Club members, many of whom were clergymen.

Chapel Farm, Deerfold, Herefordshire: a re-appraisal: part 2 *by Duncan James*..... 65
Part 1 of this paper focused on the architecture and the structure of Chapel Farm itself. Part 2 combines this material and features of the ancilliary buildings with historical information to propose a sequence of events for the chapel and its connection, if any, with the Lollards.

A Curious Feature on the Old Wye Bridge, Hereford *by Ron Shoesmith* 89
The observant pedestrian crossing the Wye by the old bridge may notice strange scars on the parapet, the remnant of one manifestation of a long-established use for the river.

John Scarlett Davis: where was he born? *by Ann Malpas*.....92
The artist John Scarlett Davis came from a well-known Leominster family of tradesmen. His birthplace is confidently marked by a plaque, but this is not accurate, and other options are considered.

Robert Maulkin Lingwood *by John Eisel* 103
Although Lingwood was the first president of the Woolhope Club, he published little in the *Transactions* and biographical details have been sparse. More material has now come to light on his friendships in the national scientific community and on his often troubled life.

The early history of Wilton castle and manor, Herefordshire *by Bruce Coplestone Crow* 110
Wilton manor was a royal possession before the Conquest and remained so until it was granted to the de Longchamps family by Henry I early in the 12th century. This is the history of its ownership until it passed to the Grey family in the middle of the 13th century.

A case of mistaken identity: The Fosse, Captain Pendergrass and Mr Smirke <i>by John Eisel</i> .	118
The house called <i>The Fosse</i> on Castle Green in Hereford is claimed to have been commissioned by Captain James Pendergrass, designed by (Sir) Robert Smirke, and completed in 1825. All these statements are found to be incorrect.	
A kiln at New House, Brilley <i>by Michael Harrison</i>	127
A hitherto-unknown pottery kiln at Brilley, probably 17th-century, is identified and the wares described.	
Herefordshire's historic weather <i>by Rosalind Lowe</i>	132
Letters, diaries and newspapers give much information about unusual weather . This is the first of a planned series of papers recording these incidental references.	
Reports of Sectional Recorders, 2009.....	134
