| Presidential Address 2015: Local government in Hereford from the Great Charter of 1215 by Jean O'Donnell | 35 |
| This address provides a brief survey of the development of Hereford as an independent borough from 1215 until the year 2000. In 1215 the burgesses in Hereford gained the right to have a Guild Merchant and from this emerged the government and status of the borough. Local Authority re-organisation from the 1970s reduced the autonomous powers of the city council. In 2000 Hereford became one of only seven parish councils in England with city status. | |
| | |
| The apparent dearth of surviving medieval domestic property in parts of Herefordshire: a reappraisal of the influence of Owain Glyndŵr's rebellion by C. J. Boylett | 51 |
| In the area surrounding Kington, Huntington and Eardisley there are few examples of domestic property construction dated to earlier than c.1420. This article offers a reappraisal of the evidence regarding the influence of the rebellion of Owain Glyndŵr on this phenomenon. | |
| | |
| The Hereford Freehold Land Society: its role in the expansion of Hereford in the nineteenth and early twentieth century by John Eisel | 84 |
| This paper examines the role of the Hereford Freehold Land Society in the expansion of Hereford from the mid-nineteenth century and argues that the organisation played an important role in the provision of building sites for the 'industrious working man'. | |
| | |
| The hidden past of Chase Woods in the parishes of Ross and Walford by Heather Hurley | 121 |
| This paper outlines the history of Chase Wood, outside Ross-on-Wye. The woodland rises to 660ft above the Wye and its natural resources have been exploited since the Mesolithic and Neolithic periods. | |
| | |
| Thomas Blashill senior: land agent at Hampton Court and Garnons, c. 1825-1860 by David Whitehead | 131 |
| Thomas Blashill senior, who has regularly been confused with his nephew of the same name, worked as a land agent at a number of notable estates in Herefordshire where he was responsible for the remodelling of the principal houses as well as managing the estate. | |
| | |
| Thomas Blashill junior: architect, antiquarian and prominent Woolhopeian by David Whitehead and Henry Connor | 140 |
| Thomas Blashill worked as an assistant to his uncle, also Thomas, a land agent and surveyor in Herefordshire, from whom he learned surveying and general building practices. This article explores his antiquarian interests which informed his work as an architect. | |

| | |
|--|-----|
| An archaeological evaluation of the Old Priory buildings, Leominster: Saxon, medieval and later discoveries by Bruce Watson | 167 |
| Excavations in 2005 revealed a wealth of evidence about the use of the site from the early-Saxon period to the nineteenth-century. Finds included a wide variety of faunal material and many fragments of broken glazed tiles. After the demolition of the cloisters in the sixteenth century the site was extensively quarried for building stone. | |
| Ten years of change at Whitman's Hill Quarry and Woodland by Janet Parry..... | 193 |
| This article records the Hereford and Worcester Earth Heritage Trust's project to save an abandoned quarry and convert it into a geological site of interest for the general public and academic researchers. The Woolhope Naturalists' Field Club was invited to record the wildlife on the site and monitor the changes over ten years both in the quarry and adjacent woodland. | |
| 2015: the year of two eclipses by Paul Olver | 203 |
| During 2015 astronomers were able to observe two notable eclipses from Herefordshire; a partial eclipse of the Sun on 20 March and a total eclipse of the moon on the night of 27-28 September. | |

LIST OF COLOURED PLATES

Presidential Address 2015: Local government in Hereford from the Great Charter of 1215 by *Jean O'Donnell*

- Plate 1.1 The earliest seal (1227) of the City of Hereford. The three lions are taken from the Royal arms as until 1189 the City belonged to the King.
- 1.2 Councillor Len Tawn taking office from the Right Worshipful Mayor, Phillip Edwards, May 2014.
- 1.3 The initial letter from Elizabeth I's Charter of Incorporation, 1597.
- 1.4 Map of Hereford, 1806, engraver J. Roger (pub. Verner, Hood & Sharp), showing buildings in High Town and the Town Ditch encircling the medieval walls. The City coat of arms shows the original lions plus the saltires and motto granted by Charles I.
- 1.5 The Mansion House, Widemarsh Street, 1974. Built for Dr. William Brewster in 1698, the building housed the Corporation offices and Guildhall between 1771 and 1903 when its conversion to retail premises ruined the frontage. It stood opposite the former Guildhall by the Butter Market. The latter was destroyed by fire with the market in 1922. A small part remains within the present Butter Market and Phillip Morris store.
- 1.6 Louise Luard OBE, first woman to be Mayor of Hereford, served in 1929 and 1936.

The Hereford Freehold Land Society: its role in the expansion of Hereford in the nineteenth and early twentieth century by *John Eisel*

- Plate 2.1 Freehold Land Society estates, superimposed on the 1905 edition of the 6-inch OS map. Those of the Hereford Freehold Land Society are numbered in date order of development, but in order that the map is not reduced too small, the further estates (Westfields and Moor Park) have been omitted.

The hidden past of Chase Woods in the parishes of Ross and Walford by *Heather Hurley*

- Plate 3.1 The extensive view from the summit of Chase Hill was admired by Club members during a field trip in 1901. There is no public access in 2016.
- 3.2 Heather Hurley (on right) at the Chase Hill information panel, Fernbank Road, Ross-on-Wye.

Ten years of change at Whitman's Hill Quarry and Woodland by *Janet Parry*

- Plate 4.1 Whitman's Hill quarry and woodland, 2005.
- 4.2 Ploughman's spikenard, July 2009.
- 4.3 Bund populated by teasel, 2008.
- 4.4 Wild Garlic, *Allium ursinum*, carpeting the woodland floor.
- 4.5 Great Tit chicks in nest box.
- 4.6 Doormouse in box

2015: the year of two eclipses by Paul Olver

- Plate 5.1 Total lunar eclipse at perigee—28 September 2015—taken in Hereford by Mark Chamberlain. The sequence of photos from top left to bottom right shows the advancing shadow of the earth over the Moon's surface leading to total eclipse and the characteristic copper-red colouration.

Archaeology, 2015 by Ron Shoesmith

- Plate 6.1 Bromyard Downs: volunteers and Herefordshire Archaeology staff with original rifles loaned by Herefordshire Museum Service.
- 6.2 Excavation of the westernmost mound at Dorstone Hill in 2015, viewed from the north-east. The surviving north-facing stone perimeter walling of the long mound is at right-centre, and the northern row of post-holes of the preceding timber hall at right. A parallel series of larger post-holes for major roof-supporting posts is visible nearer the later walling. Grid-sampling of the burnt remains of the hall (encased between the later north and south walls) is occurring at the centre. The façade and forecourt are at left foreground (Trench dimensions 30m x 20m).
- 6.3 Whitchurch: Merlin's cave. Bone pit prior to excavation
- 6.4 Whitchurch: Merlin's cave. Bones recovered from pit.
- 6.5 Plan showing the features found at Peterstow
- 6.6 Aerial photograph of Harland's Wood Field from the south. The ditches of the western-most moated site are plainly visible at left. The platform sample-excavated in October 2015 is at centre of the image, but its moat is obscured by later ditches and narrow cultivation ridges. The former woodland boundary bank divides off the eastern portion of the field, and the slighter cultivation ridging lies within the former Harland's Wood in this area. The line of the woodland bank is perpetuated by the field-hedge at lower right.
- 6.7 Excavations at the Harland's Wood Field platform, Bosbury, looking northwards across Trench 2, with demolition rubble from the medieval building exposed
- 6.8 Weston-under-Penyard: cleaning mosaic floor in villa complex

Botany, 2015 by Peter Garner

- Plate 7.1 Lesser Twayblade Orchid (*Neottia cordata*, until recently known as *Listera cordata*)
- 7.2 Lesser Twayblade Orchid (*Neottia cordata*, until recently known as *Listera cordata*)
- 7.3 Fiddleneck (*Amsinckia micrantha*)
- 7.4 Ivy Broomrape (*Orobanche hederæ*)

Geology, 2015 by *Moira Jenkins*

- Plate 8.1 Geological SSSI at the Scar with red beds of Upper Silurian Raglan Mudstone Formation
- 8.2 Moss growing on calcareous tufa at the Weir Garden, seen from the canoe
- 8.3 Breinton Gorge; Mudstone cliff showing calcrete layer with blueish tinge
- 8.4 Huntsham Hill; massive beds of Black Rock Limestone (Lower Dolomite) above the railway tunnel entrance overlying thinly bedded Avon Group (Lower Limestone Shales)
- 8.5 Huntsham Hill crags; geode in Upper Devonian Huntsham Hill Conglomerate (Quartz Conglomerate)
- 8.6 Gastropod and the orthoceras *Kionoceras virgatum* found in Ludlow Shales

The Hereford Freehold Land Society: its role in the expansion of Hereford in the nineteenth and early twentieth century by John Eisel

| | | |
|--------|--|----|
| Fig. 1 | Widemarsh 1851. The first estate developed by the Hereford Freehold Land Society in 1851, in the area now called Newtown. As part of the project, two roads had to be constructed, what is now the northern end of Edgar Street, and Millbrook Street. | 86 |
| 2 | Newtown cottages. Allotments on the Freehold Land Society estates were generous and often more than one dwelling was built. An extreme example occurs at the north-west corner of the first estate at Newtown, where a terrace of cottages was built sideways on to the road. | 87 |
| 3 | The demonstration house, built by Thomas Jenkins on his allotment at the south-east corner of the Hunderton estate, still survives, but the brickwork is concealed by a layer of render. However, the brick pilasters are characteristic of the so-called rat-trap bond. | 88 |
| 4 | Hunderton. Two roads were built for the development, the estate was divided into 26 allotments, and of those successful in the ballot, over a third had fully paid up for their share. | 89 |
| 5 | The varied development on the various Freehold Land Society estates is well illustrated by the south-east part of the Hunderton estate. Comparison with the estate map shows that this was laid out as three allotments, the first of which was developed as a terrace of five houses, then a detached house, and finally the pair of cottages built for Thomas Jenkins. | 90 |
| 6 | Datestones in Guildford Street, in the Above Eign estate. | 91 |

The Hereford Freehold Land Society: its role in the expansion of Hereford in the nineteenth and early twentieth century by *John Eisel (contd)*

| | | <i>Page</i> |
|-------|---|-------------|
| Fig. | 7 Ailsbrook Place, part of the third Freehold Land Society development at Newtown. | 94 |
| | 8 Widemarsh West. The development adjoining the race course was of irregular shape, with the result that the allotments were of varying sizes. A contemporary map marks this as New Town West, with the earlier development as New Town East | 95 |
| | 9 Moorfield Inn. Most of the Freehold Land Society developments included a public house. However, because these were small locals, they are suffering economic pressures. Here the Moorfield Inn is closed and boarded up in 2016 | 96 |
| | 10 One of the earlier allotments to be developed on the Bartonsham estate | 97 |
| | 11 Bartonsham. The irregularly-shaped Bartonsham development is centred about the militia barracks. Jones's <i>Guide</i> of c. 1867 states that this area is 'covered with new tenements of various sizes, many of which are very commodious.' This emphasises the varied nature of the Freehold Land Society's estates | 98 |
| | 12 Westfields. Although the Westfields estate was developed from the 1860s, its relatively remote situation made it less popular and so was slowly built up. The long gardens lend themselves to development with Glendale Close and Bilston Close built in the backlands between Westfield Street and Highmore Street. The process continues today | 100 |
| | 13 A comparison between large houses and rather more modest ones along the Whitecross road, on the Whitecross estate | 102 |
| | 14 Chapel, Clifford Street. Although the former chapel in Clifford Street has now been converted into a pair of houses and partly rendered, the side elevation indicates that its previous use was non-domestic | 103 |
| | 15 A mixture of houses of different periods and sizes along Eign | 105 |
| | 16 Eign Road. The purchase of this long roadside frontage on Eign Road enabled the full development of the Portfield estate and the building of Cive Street. The house on the corner of what is now Ledbury Road was occupied by Richard Johnson, the noted Hereford historian. | 106 |
| | 17 Tower Road, Broomy Hill. Despite being closer to the city centre than the Westfields estate, the Barton estate on Broomy Hill was also only slowly developed | 108 |
| | 18 An early datestone in Green Street, part of the Castle Green estate | 109 |
| | 19 Meyrick Street. Houses built on the Conservative Land Society estate on Whitecross road were generally on a larger scale, such as these houses in Meyrick Street | 114 |
| Table | 1 Hereford Freehold Land Society land purchases and apportionments reported in <i>HJ</i> 17 March 1866 | 104 |

The hidden past of Chase Woods in the parishes of Ross and Walford by Heather Hurley

| | | |

| 2 | View of Ross and Chase Hill from Ashwood, Samuel Ireland, <i>Picturesque views on the River Wye</i> (London, 1797). | 123 |
| 3 | Mesolithic worked flints. | 123 |
| 4 | Vine Tree Inn, 2012 | 124 |
| 5 | Puckeridge Lane, 2012 | 125 |
| 6 | Boundary marker in Chase Wood between the property of Kingsmill Evans and Chandos Hoskyns. The E is just visible. | 126 |
| 7 | Land Valuation 1910 | 127 |

Thomas Blashill senior: land agent at Hampton Court and Garnons, c. 1825-1860

by David Whitehead

| | | |
|--------|---|-----|
| Fig. 1 | South front, Hampton Court, drawn by Simon Fisher of Hereford, c.1790 two decades before Richard Arkwright bought the estate from the earl of Essex in c.1810. It shows the gothic make-over by James Wyatt and the grounds recently planted, perhaps by Humphry Repton. | 132 |
| 2 | North front, Hampton Court in the early 19th century, before the alterations supervised by Thomas Blashill senior after 1832. The landscaping has now matured (<i>Beauties of England and Wales VI</i> , 1805) | 132 |
| 3 | Knapp Farm, part of the Garnons estate, was rented to Robert Blashill, Thomas senior's brother, in the late 1840s. The early Georgian brick house sits on a bluff ('knapp') above the modern Byford Bridge. | 133 |
| 4 | The Steppes at Garnons, an ancient inn on the main road to Wales until the new turnpike was created in 1791. It was acquired by the Garnons estate with a small holding of land and rented to Henry Blashill in the late 1840s. He was Thomas senior's nephew and the brother of Thomas Blashill junior. The brothers had recently arrived from East Yorkshire, to join their uncles. | 134 |
| 5 | William Atkinson's reconstructed mansion is seen in the 1830s through the encroaching woodland. Hidden behind the flamboyant gothic façade was a kitchen wing, housed in the remains of an earlier medieval or Tudor house. | 136 |
| 6 | Fortuitously Blashill's kitchen range of 1856-7 survives on the left of the modern photograph. It was converted into a modern residential block by Sir Reginald Blomfield in c.1908. Atkinson's range was subsequently virtually demolished and Blashill's sturdy pile has become the entrance front to the house. | 138 |

Thomas Blashill junior: architect, antiquarian and prominent Woolhopeian by David Whitehead and Henry Connor

| | | |
|--------|--|-----|
| Fig. 1 | Thomas Blashill (1830-1905), sketched as a county worthy c.1880, <i>Herefordshire portraits: (past and present)...</i> , Hereford: Jakeman and Carver, 1908, p.63. | 141 |
|--------|--|-----|

Thomas Blashill junior: architect, antiquarian and prominent Woolhopeian by David Whitehead and Henry Connor (contd)

| | <i>Page</i> |
|---|-------------|

| 3 Wharton Court, near Leominster, sketched by Blashill for the frontispiece of the <i>TWNFC</i> , 1868. | 146 |
| 4 Bull's sketch of the Lollard 'chapel' at Deerfold found in his letter to Blashill dated 7 July 1869. | 148 |
| 5 Blashill's sketch of the Lollard 'Chapel' provided for the <i>TWNFC</i> for 1869. Bull was disappointed by his friend's archaeological honesty (<i>TWNFC</i> , 1869, pp.182-3) | 149 |
| 6 Romanesque arch sketched by Bull in a letter of 1 January 1873 | 150 |
| 7 Brinsop Court as Blashill would have seen it in 1872 and before the restoration by H. Avray Tipping in 1912-3. (H. Thornhill Timmins, <i>Nooks and Corners of Herefordshire</i> , 1892) | 151 |
| 8 Kilpeck Church in c.1830, before the restorations of L.N. Cottingham in 1847-8 and J. P. Seddon in 1864. | 152 |
| 9 Tewkesbury Abbey before restoration, engraved by the Worcester artist James Ross for W. Dyde, <i>The History and Antiquities of Tewkesbury</i> , 1798 | 154 |
| 10 The choir of Tewkesbury Abbey, 1874, a year before Blashill's tour and before Scott's restoration (J. H. Blunt, <i>Tewkesbury Abbey</i> , 1875) | 155 |
| 11 Odda's Chapel at Deerhurst just after its 'discovery' and restoration in 1885, a decade after Blashill's visit in 1875 (George Butterworth, <i>Deerhurst: A Parish of the Vale of Gloucester</i> , 1887) | 156 |
| 12 The church at Llanthony which Blashill correctly identified as the Infirmary of the Priory, not an ancient Celtic church. | 157 |
| 13 Dore Abbey, Blashill's elevations and sections presumably reduced from large-scale drawings produced in the architect's office, from Blashill, 'Abeydore' (<i>TWNFC</i> , 1883, pp. 4-5). | 158 |
| 14 Carved capitals, Dore Abbey, presumably reduced from large-scale drawings produced in the architect's office, from Blashill, 'Abbeydore' (<i>TWNFC</i> (1883), pp.5-10). | 159 |

An archaeological evaluation of the Old Priory buildings, Leominster: Saxon, medieval and later discoveries Bruce Watson

| | |
|--|-----|
| Fig. 1 The excavation in progress 26 August 2005, view looking west. In the centre of the trench the robbed-out remains of the cellared building adjoining the western side of the cloisters is being excavated. | 168 |
| 2/3 Site location within Leominster showing the possible extent of the Saxon monastic precinct. With an inset Figure 3. Trench location within the Old Priory buildings car park | 169 |
| 4 G4 Middle Saxon features | 171 |
| 5 G5 Late Saxon features | 172 |

An archaeological evaluation of the Old Priory buildings, Leominster: Saxon, medieval and later discoveries *Bruce Watson (contd)*

| | <i>Page</i> |
|--------|---|
| Fig. 6 | Composite remains of the cloister garth wall foundations, view looking north. At the southern end is robber trench (65) SG13/G8 and in-situ masonry (88) SG14/G8, in the centre masonry (80) SG11/G6, and at the northern end masonry (89) SG12/G7. 176 |
| 7 | The earlier phases of the medieval cloister garth, G6 and G7 foundations. 177 |
| 8 | Left: the later phase of the cloister garth wall (G8), plus the mortar bedding for the paving (SG21), plus the robbed out walls of the adjoining half-celled building (G9) and ditch (SG18/G10). Right: later deposits within the cloister garth (SG19/G10) 179 |
| 9 | Plan of the medieval priory based on Brown and Wilson (1994, illus 37) showing the excavated area within the cloisters 181 |
| 10 | G11 earlier activity within the western cloister: postholes SG24, robber trenches SG23 & SG25, SG17 & SG20 deposits 183 |
| 11 | Dissolution period activity in the western cloister. In the centre of the trench can be seen the G24 postholes and the line of the robber trenches of the half-celled building (G9) and the masonry of the various phases of the cloister garth wall (G6-8), view looking north 184 |
| 12 | G11 later activity within the western cloister SG26 deposits and ditch SG27 185 |
| 13 | G12 pitched stone trackway (22) being cleaned, view looking east 186 |
| 14 | G12 pitched stone trackway (SG28) 186 |
| 15 | G13 deposits (SGs 29 and 30) and postholes (SG31) 187 |
| 16 | The car park phase, showing deposits and features, looking north 188 |
| 17 | G14 selective features: the large circular raised bed complete with flag pole (SG 33) and the western portion of second smaller raised bed within the tarmac car park 189 |

Ten years of change at Whitman's Hill quarry and woodland *by Janet Parry*
